

Financial Management

BroadPoint Federal is an Oracle Gold Certified Partner and a leading systems integrator of Oracle E-Business Suite (EBS) Federal Financial Management solutions in the federal government sector. Among our staff are CPAs, PMPs, senior level Oracle business analysts, database administrators, developers, testers, and trainers.

We have served as a prime contractor as well as a major subcontractor for two decades on several marquee federal financial management projects. We have provided business and technical leadership as well as support services. We work collaboratively with both our government clients and other contracting partners to deliver the best performance and most cost-effective solutions to resolve the toughest government challenges.

BroadPoint Federal provides a wide range of functional and technical services spanning System Integration and Enterprise Resource Planning, Business Management Consulting, Financial Management and Database Administration. These services include application implementations, upgrades, and operations and maintenance (O&M) support using proven system development lifecycle (SDLC) and project management methodologies and practices such as Agile, Waterfall, and the Oracle Unified Method (OUM) in conjunction with the Project Management Institute's (PMI) Project Management Book of Knowledge (PMBOK). In addition, we follow the ITIL / IT Service Management (ITSM) and CMMI Level 3 practices and procedures for continuous process improvement. Our expert developers follow the Oracle CEMLI guidelines for Configurations/Customizations, Extensions, Modifications, Localizations, and Integration for the development of Oracle Forms, Reports, Interfaces, Conversions, Extensions, Enhancements, and Workflows.
